FM8002 - Application Note

Layout and thermal guidelines for FM8002

1. Scope
  This application note is a demo artifact for website preview.

2. Recommended layout
  Keep the input capacitor loop as small as possible.
  Use a solid ground plane under the device.

3. Thermal considerations
  Provide sufficient copper area on the drain / VOUT pads.

4. Measured values (demo)

Input Voltage	2.5V - 6.0V
Output Current	1A
PSRR	70dB @ 1kHz
Temp Range	-40degC ~ 125degC
