FM8003 - Application Note

Layout and thermal guidelines for FM8003

1. Scope
  This application note is a demo artifact for website preview.

2. Recommended layout
  Keep the input capacitor loop as small as possible.
  Use a solid ground plane under the device.

3. Thermal considerations
  Provide sufficient copper area on the drain / VOUT pads.

4. Measured values (demo)
  Input Voltage 1.8V - 5.5V
  Output Current 300mA
  Quiescent Current 1.2uA
  Shutdown Current < 100nA
  Package SOT-23-5
