FM9001 - Application Note

Layout and thermal guidelines for FM9001

1. Scope
  This application note is a demo artifact for website preview.

2. Recommended layout
  Keep the input capacitor loop as small as possible.
  Use a solid ground plane under the device.

3. Thermal considerations
  Provide sufficient copper area on the drain / VOUT pads.

4. Measured values (demo)

Buck Channels	2
LDO Channels	1
Charge Current	500mA
Standby	< 5uA
